

General Electric Power System (M) Sdn. Bhd.

Letter of Appreciation
Port Dickson Power Project
(4 X 100 MW Gas Turbine/Generator)
Malaysia

General Electric Power System (M) Sdn. Bhd., would like to thank and express our appreciation to Equator Engineering Sdn Bhd for its tremendous efforts to meet the GEPSM's objective schedule for construction of Port Dickson Power Plant.

As an E.P.C contractor, Equator Engineering Sdn Bhd has carried out the Engineering, Procurement and Construction of civil, mechanical and electrical works in a record time of less than (8) months from the date of notice to proceed to readiness for synchronization of first unit. This outstanding performance by dedicated and self-motivated workforce of Equator Engineering Sdn Bhd made the Port Dickson Power Project the fastest IPP project in Malaysia.

This impressive and outstanding performance of Equator Engineering Sdn Bhd has been appreciated by our management and we wish Equator Engineering Sdn Bhd all the success in its future endeavours.
